Swift's Specific

Is nature's own remedy, made from roots
gathered from the forests of Georgia. The
method by which it is made was obtained by
a half-breed from the Creek Indians who in-
habited a certain portion of Georgia, which
was communicated to one of the early set-
tlers, and thus the formula has been handed
down to the present time. The above cut
represents the method of manufacture
twenty years ago, by Mr. C. T. Swift, one of
the present proprietors. The demand has
been gradually increasing until a \$100,000
laboratory is now necessary to supply the
trade. A foreign demand has been created,
and enlarged facilities will be necessary to
meet it. This great
